KENNY SAPUTRA
IT Infrastructure & Support Specialist
Jakarta | 085773282889 | kensaputra4@gmail.com

SUMMARY

Results-driven IT Support & Infrastructure professional with hands-on experience in network deployment, system administration, endpoint security, and enterprise IT operations. Proven ability to optimize network performance, manage Active Directory environments, deploy security solutions, and maintain critical systems in healthcare and manufacturing environments. Adept at troubleshooting complex technical issues and delivering reliable, user-focused IT solutions.

EXPERIENCE

Siloam Hospitals Group – Jakarta
Desktop Support Staff
Jan 2025 – Present (Employment transitioned to outsourcing via PT Enigma Cipta Humanika in Oct 2025)

- Managed Active Directory accounts & access permissions.
- Administered Microsoft 365 environment including user setup, password resets, and email troubleshooting.
- Configured and maintained VPN remote access for secure connectivity.
- Installed & configured Access Points to improve wireless coverage.
- Performed network troubleshooting & configuration to maintain connectivity.
- Provided IT support for medical devices & hospital systems.
- Diagnosed & resolved hardware/software issues for PCs, printers, and endpoints.
- Performed daily server monitoring to maintain system uptime.
- Troubleshot Dinstar IP phone systems.
- Created user guides to improve IT literacy and reduce recurring issues.

PT. Jui Shin – Karawang
IT Support
Sep 2023 – Mar 2024

- Built and configured PCs according to company requirements.
- Installed and maintained CCTV systems.
- Configured network switches.
- Installed software and Windows operating systems.
- Troubleshot hardware and software issues.

PROJECTS

- **Hospital Wi-Fi Optimization – Siloam Hospitals Group**
  Led the replacement, installation, and configuration of new Access Points across hospital departments, enhancing wireless coverage and connectivity for staff and patients
- **Network Switch Port Configuration Automation – Siloam Hospitals Group**
  Developed an automation script for switch port configuration, streamlining the process of assigning and managing ports, improving setup efficiency, and reducing manual errors.
- **CrowdStrike Endpoint Security Deployment – Siloam Hospitals Group**
  Installed and configured CrowdStrike security agents on all endpoint devices across the hospital network, achieving full asset coverage and strengthening system defenses against cyber threats.
- **Speed LAN Optimization – Siloam Hospitals Group**
  Diagnosed low-speed LAN connections across hospital departments, re-crimped and tested network cables to restore optimal performance, ensuring stable and high-speed connectivity for operational needs.
- **5R Workplace Improvement – Siloam Hospitals Group**
  Implemented the 5R methodology (Sort, Set in order, Shine, Standardize, Sustain) in the IT department to organize equipment, improve cable management, and maintain a clean and efficient working environment, resulting in enhanced productivity and reduced troubleshooting time.

- **Server Room & Shaft Temperature and Humidity Monitoring Device – Siloam Hospitals Group**
  Designed and tested a prototype device for monitoring temperature and humidity levels in server rooms and cable shafts, aiming to improve environmental control and prevent equipment overheating or moisture-related issues.

EDUCATION

Bachelor of Information Technology | Tarumanagara University | GPA: 3.10
